Job Notification Form, IIT Delhi

Company Overview

Name: Works Applications Co., Ltd.

Website: https://www.worksap.com/

Company Type: MNC (Foreign Origin)

Description: The business infrastructure that WAP provides enables our clients to get ahead in the game: the more we improve our ERP systems, the quicker our clients can make their business decisions and grasp what is to come at an even earlier stage. Let IT do the routine work for you, so that you can allow each of your workers to focus their time on the more creative tasks at hand. Imagine the excitement in a future where new services and products are born one after the other, each of them providing ever more people with joy and inspiration. That is the kind of future that we strive to realize.

Job Details

Designation: Software Engineer

Type: Information Technology

Place of Posting: Singapore, Tokyo

Job Details: WAP is looking for young, talented software engineering professional to accelerate our product development.

The candidate is expected to join our office in Singapore or Tokyo and in very diverse engineering team, and contribute in developing our flagship product.

As a junior software engineer, we expect you to exercise your software development skills and contribute to the team by offering creativity and energy.

Responsibilities;

Perform software engineering tasks on assigned system(s) to expand business coverage of our product and raise customer satisfaction.

Tasks include;

Work on functional design, architecture design, and development of new features or sub-systems in our ERP system, "COMPANY". Develop software patches and new features under the supervision of a senior member in the team. Detect, isolate, and resolve problems encountered by our customers during implementation of or operating business through our software. Act as liaison and coordinate engineering work with engineers locating in Tokyo / Shanghai / Chennai (India). Research on new software technologies, especially in areas of open source technologies, cloud computing, java programming, AI, and large-scale software development. Involved in quality assurance processes of assigned product.

Qualifications;

Bachelor degree or higher in Computer Science, Information Systems, Software engineering, or any other related technical expertise.

Minimum Requirements;

Intermediate-level Java skills. Good knowledge of Javascript/CSS/html. Good knowledge of relational and non-relational databases. Good knowledge of middleware, hardware, and network. Strong analytical and problem-solving skills. Strong logical thinking ability.
Good communication skills, both verbal and written, in English. Ability to perform under multi-task, dynamic environment with changing priorities.

Skills or Experiences considered as a plus;

Experience in developing business applications. Experience in developing web applications. Experience in working with Oracle database, Websphere.

International:	Yes
