Job Notification Form, IIT Delhi

Company Overview

Name: Google

Website: www.google.com

Company Type: MNC (Foreign Origin)

Description: Google is not a conventional company, and we don't intend to become one. True, we share attributes with
the world's most successful organizations – a focus on innovation and smart business practices comes to
mind – but even as we continue to grow, we're committed to retaining a small-company feel. At Google,
we know that every employee has something important to say, and that every employee is integral to our
success. We provide individually-tailored compensation packages that can be comprised of competitive
salary, bonus, and equity components, along with the opportunity to earn further financial bonuses and
rewards. Googlers thrive in small, focused teams and high-energy environments, believe in the ability of
technology to change the world, and are as passionate about their lives as they are about their work. For
more information, visit www.google.com/careers.

Job Details

Designation: Software Engineer, University Graduate

Type: Other (Engineering & Operations)

Place of Posting: Bangalore or Hyderabad

Job Details: Google's software engineers develop the next-generation technologies that change how millions of users
connect, explore, and interact with information and one another. Our ambitions reach far beyond just
Search. Our products need to handle information at the the scale of the web. We're looking for ideas from
every area of computer science, including information retrieval, artificial intelligence, natural language
processing, distributed computing, large-scale system design, networking, security, data compression,
and user interface design; the list goes on and is growing every day. As a software engineer, you work on
a small team and can switch teams and projects as our fast-paced business grows and evolves. We need
our engineers to be versatile and passionate to tackle new problems as we continue to push technology
forward. As a key member of a small and versatile team, you design, test, deploy and maintain software
solutions.
Responsibilities:

Responsibilities:
? Research, conceive and develop software applications to extend and improve on Google's
product offering.
? Contribute to a wide variety of projects utilising natural language processing, artificial intelligence,
data compression, machine learning and search technologies.
? Collaborate on scalability issues involving access to massive amounts of data and information.
? Solve all problems that come your way.
Minimum qualifications:
? BS/ MS or equivalent practical experience.
? Experience with Unix/Linux or Windows and/or Mac environments, distributed systems, machine
learning, information retrieval and TCP/IP.
? Experience programming in C, C++, Java and/or Python.

Joining By: July 1
